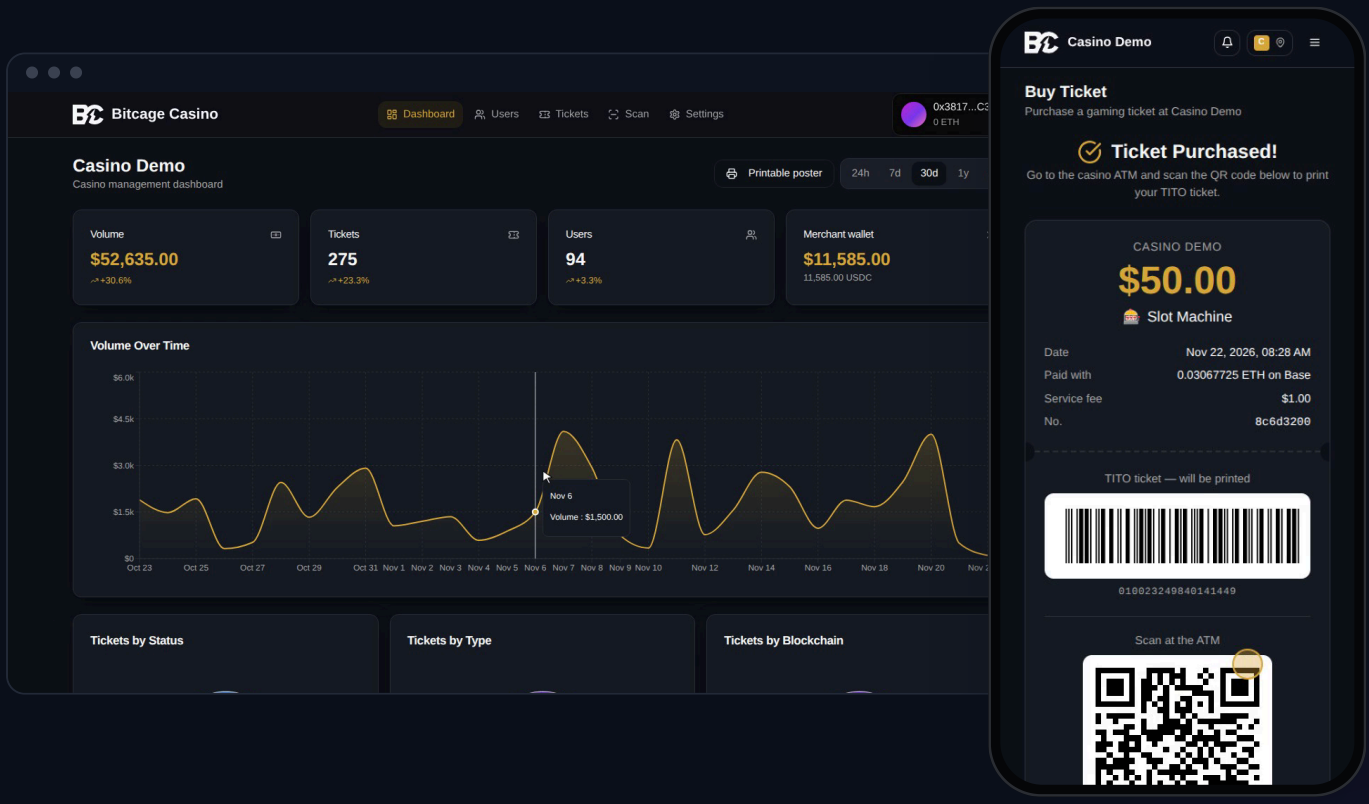
BITCAGE CRYPTO

CRYPTO PAYMENTS FOR GAMING

Your crypto. Your desires. In seconds.

Crypto payments for casinos and beyond.

Let your players spend their crypto wherever it is. Sign in with your email or phone, and start playing in seconds.



WHY BITCAGE

Email Login

Sign in with your email or phone number to get a secure, auto-generated wallet. Transfer crypto from Kraken, Binance, or any exchange.

Multi-Blockchain

Support for multiple blockchains. Players choose their preferred network for lower fees or faster transactions.

Instant Tickets

Buy slot or table tickets in seconds. No waiting, no friction - just seamless gaming.

Built-in KYC

Seamless KYC verification triggered only when needed, based on configurable thresholds.

History & control

Full transaction history, per-payment limits set by the casino, and the amount and fee shown before every payment.

How it works

1. **We set you up**
   We create your Bitcage account; you enter the wallet that receives your payments (or use your Bitcage wallet) and choose your cryptocurrencies and settlement currency.
2. **Your players sign up**
   An email or a phone number is all it takes: their secure wallet is created automatically, with no app to install. They fund it with USDC, EURC or ETH from their exchange or wallet.
3. **They buy a ticket**
   A slot or table ticket, paid in crypto from their phone or the casino's ATM: it is ready to play.
4. **You get paid in euros or dollars**
   Your player's crypto is converted automatically into EURC or USDC; the payment contract sends your share straight to your wallet, in a single transaction, as soon as the payment confirms. You can also choose to keep the crypto you receive.

MULTI-CHAIN SUPPORT

Base

Coinbase L2, secure & scalable

Arbitrum

Leading Ethereum L2

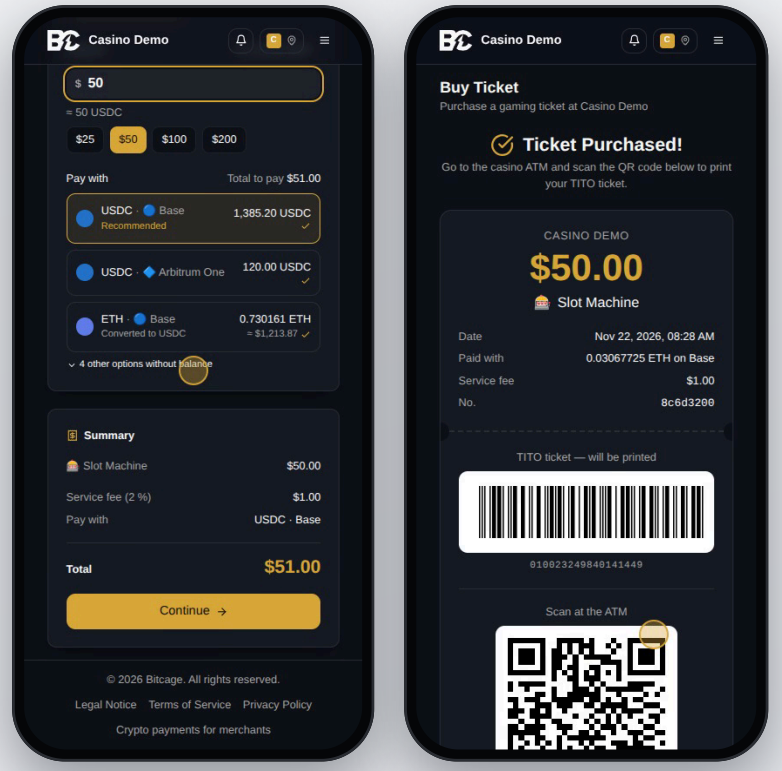
Optimism

Fast & cost-effective

THE PLAYER EXPERIENCE

Gaming made simple

Sign in with your email or phone number and get a secure wallet instantly. No extensions, no apps — just start playing in seconds.



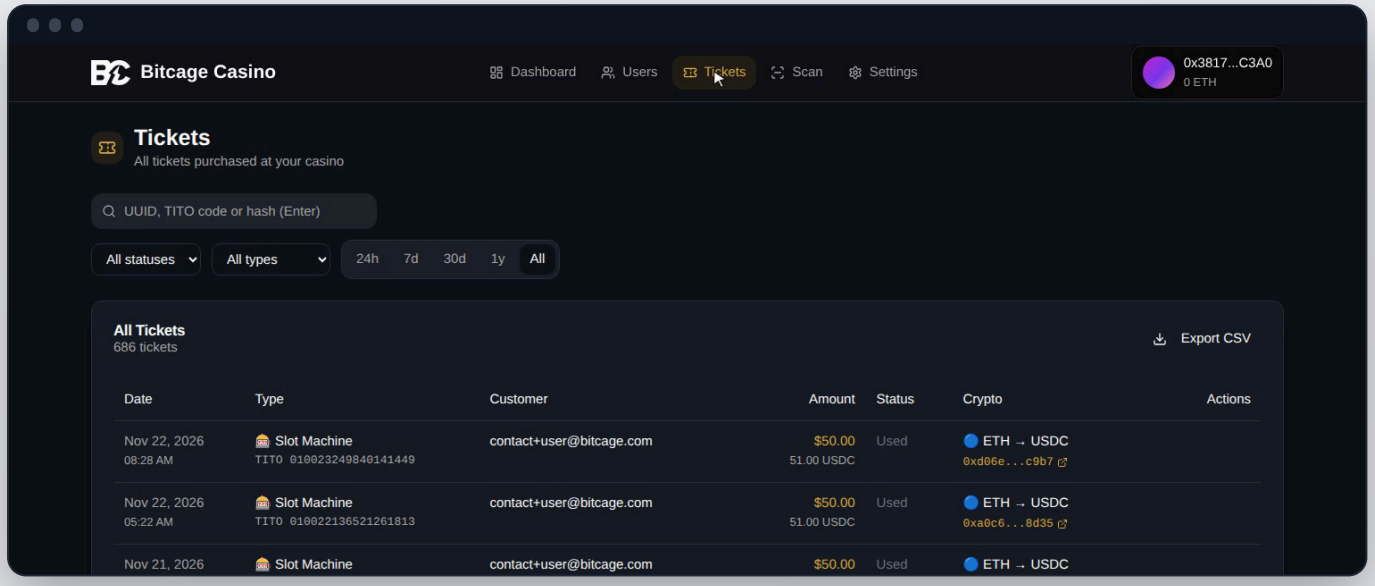
Ticket bought on the phone, ready to play

1. **Sign In with Email or Phone**
   Enter your email or phone number to get a secure, auto-generated wallet — no extensions or apps needed.
2. **See Your Balances**
   Bitcage shows your balances on each network, in crypto and in euros or dollars, and picks one that covers the total.
3. **Fund Your Wallet**
   Transfer crypto from your favorite exchange or wallet — Kraken, Binance, MetaMask, and more.
4. **Select Ticket Amount**
   Choose how much you want to spend on slot machines or table games.
5. **Start Playing**
   Your ticket is generated instantly. Head to the gaming floor and enjoy!

YOUR BACK OFFICE

Complete control for your casino

A back office to manage crypto payments, choose your settlement currency, configure KYC rules and monitor your business in real time.



TITO tickets

Players print their slot-machine tickets from the casino's ATM.

Settle in euros or dollars

Receive your payments in EURC or USDC: the player's crypto is converted automatically, with no exposure to volatility.

Dashboard & CSV exports

Real-time metrics on players, tickets and volumes; export your tickets and players to CSV.

Crypto Configuration

Enable or disable blockchains and cryptocurrencies as needed.

KYC Thresholds

Set a per-transaction threshold and a cumulative threshold over a period of your choice.

API key

Your systems mark tickets as used once they are played.

Base, Arbitrum and Optimism · ETH, USDC, EURC, USDT · non-custodial: funds go straight to your wallet
